Use of Wheat Bag

Identified hazard:

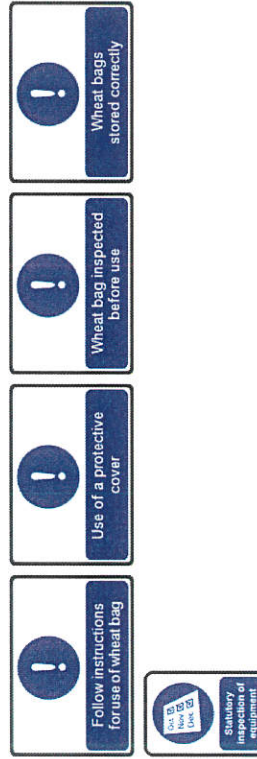

These bags are used to provide extra support for a resident in pain. There is a danger of cross contamination or can cause burns on the skin if not correctly applied.

Who is at risk?

Staff and Resident

How is the risk controlled?

The calculated risk factor for this task/operation is **3** (Probability: 1 x Severity: 3)

This is classed as a **LOW** risk

Additional Measures:

None Required
