#### **ELECTRICAL INSTALLATION CONDITION REPORT**

MALTI	
SECTION A. DETAILS OF THE CLIENT / PERSON ORDERI	NG THE REPORT
Name Birtley House Group Ltd	
Address Birtley House Bram	ıley
Guildford GU5	0LB
SECTION B. REASON FOR PRODUCING THIS REPORT	
To assess the condition of the installation in rela	ation to current standards
Date(s) on which inspection and testing was carried out	09/11/2018
SECTION C. DETAILS OF THE INSTALLATION WHICH IS	THE SUBJECT OF THIS REPORT
Occupier As above	
Address	
Description of premises (tick as appropriate)	
Domestic Commercial Industrial O	ther (include brief description)
Estimated age of wiring system 10 years	
Evidence of additions / alterations Not apparent	If yes, estimate age N/A years
Installation records available? (Regulation 621.1) No	Date of last inspection N/A (date)
SECTION D. EXTENT AND LIMITATIONS OF INSPECTION	N AND TESTING
Extent of the electrical installation covered by this report	
Circuits fed from DB19A on second floor. 20%	Sampling of terminations at enclosures
Agreed limitations including the reasons (see Regulation	634.2)
None	
Agreed with: N/A	
Operational limitations including the reasons (see page no	o N/A )
Main fuse not pulled. Insulation tested Line/Neutro	al together against Earth.
The inspection and testing detailed in this report and according	ompanying schedules have been carried out in accordance with BS 7671:2008
(IET Wiring Regulations) as amended to 01/01/2015	
It should be noted that cables concealed within trunking building or underground, have <b>not</b> been inspected unle An inspection should be made within an accessible roof	and conduits, under floors, in roof spaces, and generally within the fabric of the ess specifically agreed between the client and inspector prior to the inspection. space housing other electrical equipment.
SECTION E. SUMMARY OF THE CONDITION OF THE IN:	
General condition of the installation (in terms of electrical	safety)
Satisfactory.	
Overall assessment of the installation in terms of its suital	bility for continued use SATISEACTORY
	(code C1) and/or potentially dangerous (code C2) conditions have been identified
SECTION F. RECOMMENDATIONS	(control ) and provide the control of the control o
Where the overall assessment of the suitability of the insta	allation for continued use above is stated as UNSATISFACTORY, I/We
recommend that any observations classified as 'Danger n	resent' (code C1) or 'Potentially dangerous' (code C2) are acted upon as a matter
Observations classified as 'Improvement recommended' (	I for observations identified as 'further investigation required' (code FI). code C3) should be given due consideration.  /e recommend that the installation is further inspected and tested by 09/11/2023
	e recommend that the installation is further inspected and tested by 09/11/2023
SECTION G. DECLARATION	
signatures below), particulars of which are describ	ection and testing of the electrical installation (as indicated by my/our bed above, having exercised reasonable skill and care when carrying
out the ineraction and testing, hereby declare that	t the information in this report including the observations and the
the stated extent and limitations in section D of th	ment of the condition of the electrical installation taking into account is report.
Inspected and tested by:	Report authorised for issue by:

# CONDITION REPORT GUIDANCE FOR RECIPIENTS (to be appended to the Report)

### This Report is an important and valuable document which should be retained for future reference.

- 1. The purpose of this Condition Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service (see Section E). The Report should identify any damage, deterioration, defects and/or conditions which may give rise to danger (see Section K).
- 2. The person ordering the Report should have received the "original" Report and the inspector should have retained a duplicate.
- 3. The "original" Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner/occupier with details of the condition of the electrical installation at the time the Report was issued.
- 4. Where the installation incorporates a residual current device (RCD) there should be a notice at or near the device stating that it should be tested quarterly. For safety reasons it is important that this instruction is followed.
- 5. Section D (Extent and limitation) should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.
- 6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in Section D.
- 7. For items classified in Section K as C1 ("Danger present"), the safety of those using the installation is at risk, and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work immediately.
- 8. For items classified in Section K as C2 ("Potentially dangerous"), the safety of those using the installation may be at risk and it is recommended that a skilled person competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.
- 9. Where it has been stated in Section K that an observation requires further investigation (code FI) the inspection has revealed an apparent deficiency which may result in a code C1 or C2, and could not, due to the extent or limitations of the inspection, be fully identified. Such observations should be investigated as soon as possible. A further examination of the installation will be necessary, to determine the nature and extent of the apparent deficiency (see Section F).
- 10. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons competent in such work. The recommended date by which the next inspection is due is stated in Section F of the Report under 'Recommendations' and on a label at or near to the consumer unit / distribution board.

Certificate No: 91118

# CONDITION REPORT INSPECTION SCHEDULE FOR DOMESTIC AND SIMILAR PREMISES WITH UP TO 100 A SUPPLY

Note: This form is suitable for many types of smaller installation not exclusively domestic.
